

## Corner Pocket Layout

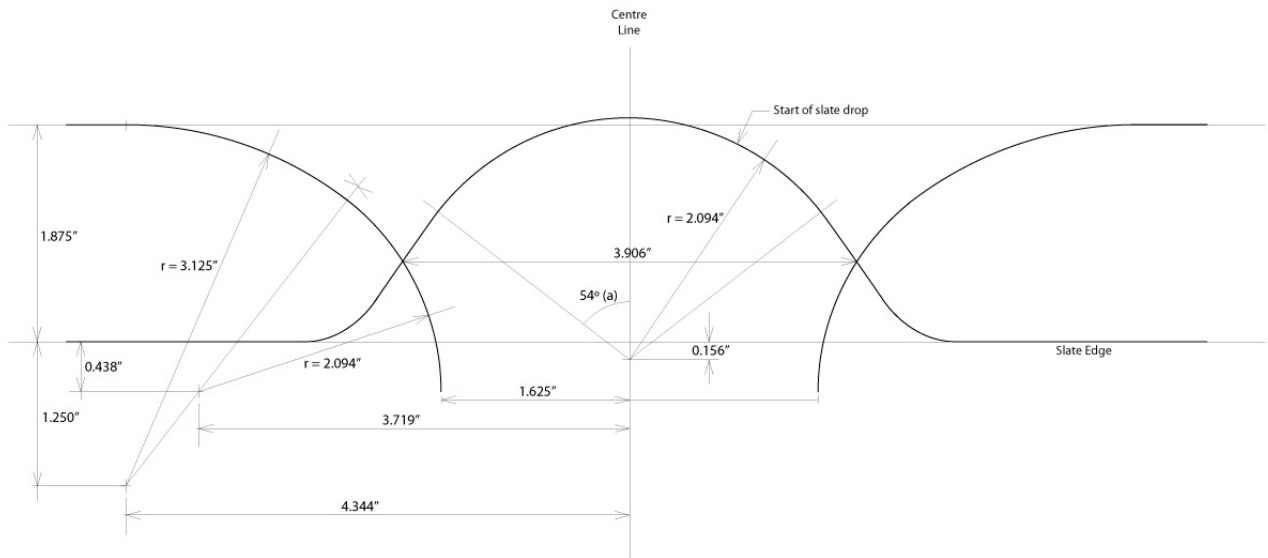

Note: This is a rationalised layout that closely matches the current TV templates. (it should be noted that the templates are not exactly symmetrical)  
 NB: There is no undercut of the cushion

Drawn: CEBP December 2007 - Updated April 2009

## Middle Pocket Layout

Note: Like the corner pocket layout this is a close match for the templates  
(a): This angle is not too critical but it will affect the slate drop/cushion intersection dimension, also not too critical  
NB: There is no undercut of the cushion

Drawn: CEBP December 2007
